PROFILE

Freelance full-stack web developer and AI integration specialist with over 15 years of professional experience. I build fast, scalable web applications using PHP/Laravel, Vue.js, React, and Python, and integrate AI solutions (LLMs, RAG pipelines, vector databases) into business workflows. Based in Debrecen, Hungary, serving clients across Europe and the United States.

SELECTED EXPERIENCE

Full-Stack Developer & Technical Consultant

Mar 2017 – Present

Self-employed (Sole Proprietor)

Freelance developer building custom web applications, survey systems, and AI integrations for clients including market research companies across Europe and the US.

- Custom Laravel/Vue.js web applications for market research clients
- AI integration: LLMs, RAG pipelines, vector databases, agentic workflows

Senior PHP Developer

Feb 2015 – Mar 2017

Fathom Minds

Led web application and API development using Yii2 framework. Set up the company's Git infrastructure and worked on the internal Flow project.

- Web app and API development with Yii2
- Set up Git infrastructure for the development team

Frontend Developer

Jul 2014 – Feb 2015

Oktafone
